

and I OOPP

TUESDAY 01.09.20

11:00 / DISCORD

PARTICIPANTS

Aline Eikeland, Hugo Ganelius, Viktor Johannesson, Emil Lundqvist, Felix Oliv

DISCUSSION

- Meetings
 - **Preliminary Tuesday and Friday 11:00-12:00**
 - **Using discord**
- Roles
 - Earlier group roles have not resulted in increased productivity
 - Preferences for graphical / logic programming exists in the group
 - Victor prefers and Emil is leaning towards graphical
 - Hugo, Aline and Felix prefers logic programming
 - Hugo has deeper knowledge in data structs and algorithms
 - **We will be working broadly but regards will be taken to personal preferences of work**
- Ambitions
 - The group share an ambition for a challenging project and a high quality product
- Managing conflict
 - **Talk through issues**
 - **If not managable on interpersonal level, use outside mediator, preferably other group member**
- Project ideas brain storming
 - Neural network

- Car simulator
 - Deep learning
 - Corona simulation
- Java version
 - Important that the group uses the same version
 - **Felix vill research and decide on common Java version**
- Documentation
 - RAD report is to be produced
 - Documentation must be written continuously
 - Code, minutes, project documentation
- Meeting structure
 - Reports
 - Questions
 - Issues
 - Discussion
 - To do
- Communication
 - Slack is commonly used
 - Discord enables both chat similar to Slack aswell as handy voice communication and screen sharing
 - **Discord is to be used**
 - **Trello for task management**
- Location
 - Distance course, everyone will not be able to physically appear at school
 - Risk of Covid-19
 - Meetings, designing and pair programming is easier meeting in person
 - **Everyone is able to work from home. Those who wishes can host additional meetups at campus**

TO DO

- Java version

- Felix
- Register group
 - Aline, needs personal information from rest of the group

NEXT MEETING

- Meeting: Friday 11:00
- Supervision: Friday 13:00
